

Admissions

Admission Policy

Schreiner University admits qualified students without regard to race, sex, color, religion, age, disability, veteran status or national origin. However, due to the physical and age requirements established for appointment to a United States service academy, Greystone applicants must meet or be capable of meeting the established academy admissions criteria to be accepted to the program.

Applications for admission to Greystone are addressed to:

Office of Admission and Financial Aid
Schreiner University
2100 Memorial Blvd.
Kerrville, Texas 78028.

*****NOTE: Stipulate that you are applying for Greystone Preparatory School program.*****

Questions regarding admission or financial aid will be referred to the Office of Admission and Financial Aid, 1-800-343-4919 or (830) 792-7217, or email questions to www.admissions@schreiner.edu or finaid@schreiner.edu.

Application deadlines: May 1 (priority) August 1 (regular)

Like Schreiner, Greystone admits students on a rolling admission basis. As soon as a file is complete, an admission decision is made after all documents are evaluated. It is the responsibility of each applicant to ensure that all required documents are received in the Schreiner Office of Admission in a timely manner. All records and transcripts become the property of Schreiner University and will not be returned to the student or forwarded to another site.

All students must have a health form and an immunization record on file in the Health Center. Health and accident insurance is mandatory for all Greystone students.

Greystone Admission

Students are encouraged to begin the application process as soon as possible in the Spring of their senior year. Evaluation of an applicant's potential for success include a review of standardized test scores (ACT or SAT), grade-point-average (GPA) and rank in the high school graduating class. A letter of recommendation from your academy recruiter to the Greystone Director is required. To apply, students must submit the following documents to the Schreiner University Office of Admission (address listed above):

1. A completed Greystone Application for Admission and a \$25 non-refundable application fee. Applications are available in the Office of Admission or through this website (see Application).
2. An official high school transcript from an accredited high school showing cumulative grade-point-average and current rank in class and graduation date.
3. Official test scores (ACT or SAT) sent directly to Schreiner University from the testing company or recorded on the official high school transcript.
4. If dual credit or co-enrolled credit during high school, an official transcript from each college or university attended.
5. A final high school transcript showing date of graduation.
6. Letter of Recommendation from your current academy recruiter.

Applicants who graduate from a non-accredited high school, a school that does not rank, a home-schooled program, or who earn a GED certificate instead of a high school diploma are required to discuss credentials with the Greystone Director prior to package submission.

Admission Offer and Commitment Fee

If a student accepts the Greystone offer of admission, the student is required to pay a \$100 admission commitment fee, which serves as serious intent to enroll and is, therefore, non-refundable. The commitment fee reserves classroom space and assures the Greystone dorm room assignment. At the time of registration, the commitment fee is credited towards the student's account. Commitment fees are due to Schreiner University within 30 days of acceptance unless an extension is requested.

Physical Examination

Part of the academy reapplication process may require candidates to undergo another thorough medical examination to ensure they are still within the physical fitness limits established for academy admission. If your examination is older than 2 years, Department of Defense Medical Examination Review Board (DODMERB) requires a medical examination. Should a student fall into this category, it is recommended they have the examination completed prior to arrival on campus to allow time for medical record screening by DODMERB and possible requests for waivers. There are several exceptional medical facilities in the Kerrville area capable of performing the medical examination; however, the Greystone daily schedule is extremely demanding making medical appointments for non-emergencies difficult. Check with your academy recruiter to verify the status of your medical examination.

Special Admission Consideration

All applicants are individually reviewed and evaluated by the Greystone Director before an admission decision is made. Students with insufficient academic preparation may be admitted with special conditions regarding course load and performance. Any applicant who is denied admission to the Greystone program has the right to appeal the denial by contacting the Greystone Director.

Tuition, Room, Board & Fees

Tuition costs for academy preparatory school education varies greatly depending on the institution and the type of program offered. The total cost for the Greystone program (fall and spring semester) including room, board, tuition and fees is \$18,000. Students are required to pay for their books and provide their individual health care insurance.

Investment in academy preparatory education is without a doubt a high-risk investment because there are few, if any, guarantees that a student will qualify for an appointment. Considering that on average, the value placed on an academy education is approximately \$275,000 for the four-year program, some feel the cost of a private preparatory program is justified regardless of how expensive it is.

When Greystone was developed, a major effort was made to minimize the cost to the student and parents. The intent was to meet the academies level of academic expectation and to provide the academic flexibility to meet individual needs of the students.

Through the affiliation with Schreiner University, Greystone delivers a high quality college-level program that earns the student up to 36 college credits. Greystone is not interested in wasting time or financial assets on courses taken in high school or extraneous activities. Time spent at Greystone is focused on meeting students academic needs at the college level based on individual abilities. The Greystone curriculum (Calculus, Chemistry, History and English Composition) prepares students for courses that have historically proven to be the most difficult for academy first-year students.
